

PUBLIC BETA FOR IPHONE

Thank you for testing.

Check how naturally you can save a thought, return to it at the right moment, and understand where your data is stored. The test does not require a daily routine.

BUILD**Current version**

Public beta on TestFlight. The current build number is shown in TestFlight.

SYSTEM**iPhone and iOS**

The minimum iOS version is shown on the TestFlight page.

Open with the iPhone camera to continue to the public beta in TestFlight.

WHAT TO TEST

Complete the full journey.

Save a thought in two ways, review its context, and meet it again in the app or widget.

01

Save manually

Enter a quote or thought, add its author and source, and write your note. Confirm that the entry appears in the library.

02

Recognize with the camera

Photograph a text excerpt, review the recognized text, and correct any mistakes before saving.

03

Return to a thought

Open the Today screen and widget. Check whether the source, note, and reason for the return are clear.

04

Check offline access

Turn off the network and open the main library. Local entries should remain available.

HOW TO SEND FEEDBACK

Tell us what happened.

Use the bot for impressions and ideas. For crashes and technical errors, TestFlight's built-in feedback is more useful.

BUG

IMPRESSION

IDEA

SECURITY

01

Add context

Include your iPhone model, iOS version, and app build. Describe the steps: what you did, what you expected, and what you saw. A screenshot or short screen recording can help reproduce the problem.

[Open the Margent Telegram bot](#)

OPEN

Do not send one-time codes, passwords, tokens, or the contents of private entries.

SECURITY AND PRIVACY

Protect personal data first.

Your main library stays on the iPhone and works offline. Server features start after sign-in. Nothing is published automatically.

IMPORTANT**Check attachments**

Before sending a screenshot or video, hide names, addresses, private entries, and any other data that is not needed to investigate the report.
